

## **Black Jack Card Counter v3.0**

First let me personally thank you for downloading our software. This program is designed to help you learn how to count cards. However the card counting features can also be disabled to allow you to play a very realistic and addictive game of blackjack. To learn more about how to play blackjack or how to count cards, please refer to the accompanying documentation.

**How to Use This Software:** When the game launches, you will be prompted to enter a bet. To change the bet amount click on it and simply enter a new bet amount and press enter to begin a hand. Once you are dealt your cards you will have all the normal casino options available. As in a real casino, you will play your hands one at a time from left to right. The bouncing arrow over your hand will let you know what hand you are playing. Once you stand on your last hand, the dealer will reveal his card and winners will be declared. To deal the next hand, simply select "place bet " again.

### **Hot Keys:**

H - Hit

S - Stand

P - Split

D - Double Down

Return/Enter - Place Bet

\* (Asterisk)- Show/Hide Chart

⌘+R - Reshuffle the Shoe

⌘+U - Surrender your current hand

⌘+Q - Quit the game

### **Other Useful Information:**

- If you change the number of decks that you are playing in the middle of a game it will not restart the current shoe. If you want to restart the shoe, you can manually reshuffle.
- If your bank is reduced to \$0, the entire game will reset and you will have a fresh start.
- After you finish your hand(s) the cards for each hand will glow with a color. These colors tell you the outcome of that hand;
  - Blue - Blackjack
  - Green - You have won this hand
  - Yellow - This hand was a push(tie)
  - Red - You have lost this hand
- The Shoe will reset after you have played your last hand. Therefore you may go over your set limit. However, this is normal casino behavior.
- There are 3 charts built into the game. The game will automatically select the proper chart for the number of decks you are playing with.
- Yes, there are cheat codes built into the game, but you will have to explore to discover them.

## **F.A.Q's**

**Q: Why does Blackjack Card Counter 3.0 connect to the internet on launch?**

A: Blackjack Card Counter 3.0 makes a connection to our server to insure that you are using the most up to date software available and to download important game messages.

**Q: Some of the graphics appear as white boxes.**

A: This happens when you run out of Video Memory. Try running at a smaller screen size and in 16 bits. If that still does not fix your problem, your computer simply does not have enough video memory to support this game.

**Q: Is there a Windows version available/planned?**

A: At this time, there is no planned Windows version since we use a lot of macintosh only libraries, However we have looked at the possibility and in the distant future there may be a port available. Check our site from time to time for the most up to the date information.

**Q: Blackjack Card Counter 3.0 suddenly will not launch.**

A: From time to time, preference files get corrupted on OS X 99% of the time, simply trashing this file will fix your problems. Delete the file called "com.dfs.BJC3.plist" located in "User/YOUR\_USER\_NAME/Library/Preferences". Make sure to write down your serial number because you will need to enter it again.

**Q: I have a great suggestion for Blackjack Card Counter 3.0**

A: Great! Email it to us and we will decide if we want to add them in the next version. Most of our features have come from user suggestions like yours.

**Q: How do I change X in the game?**

A: Most user changeable features can be done simply by clicking on them. Give it a try.

**Q: I cant seem to change the number of hands that I start a game with, why?**

A: This is a feature for registered users only. If you decide to register the game, you will be able to start with up to 4 hands at a time.

**Q: How many hands can the game support at a time?**

A: Our engine will display up to 20 hands at a time.

**Q: I registered an older version of Blackjack Card Counter. Do I have to buy another one?**

A: Not at all. We offer free upgrades for life on Blackjack Card Counter. When you first launch the game, it should automatically import your old serial number. If it does not properly import, you can enter your old serial number when prompted.

**Q: What is this statistics window I get when I register?**

A: The Statistics Window below will assist you in learning how to properly play black-jack. It will give you a good idea of how you are progressing in skill, and give you a better background on how the shoe is progressing. As well as help you monitor your progression.

Decks In Game: 8  
Cards Per Shoe: 416  
Cards Dealt: 64
