## Who can use IncPlugins?

### PHP scripts developers

The IncPlugins Open Technology is a specially designed solution to create and use plugins for PHP based web site engines.

Join IncPlugins Open Technology developers and write your own compatible plugin to enable your customers to get standard solution that will work on many IncPlugins compatible web site engines.

### Web site owners

A plugin is the fundamental building block of the IncPlugins. Any IncPlugins-based web site is the sum of its constituent plugins, where each plugin contributes functionality to the web site and is activated when the functionality it provides is needed.

Create the fastest scalable web site using IncPlugins and compatible plugins.

Any of compatible plugins are easy to install and use.

### Web site engines developers

The IncPlugins Open Technology provides an organized way for independent groups of people to add new behavior to any compatible web site engines.

Support IncPlugins Technology to get compatible plugins for your software.
