System Requirements:

(System requirements are subject to change without notice. Please consult the web site for the latest information.)

- FileMaker Pro 8 thru 11
- Mac OS X 10.5 - 10.6

Plug-in Information:

Successful integration of FileMaker plug-ins requires the creation of integration scripts within your FileMaker solution. A working knowledge of FileMaker Pro, especially in the areas of scripting and calculations is necessary. If after review of our overview videos, sample scripts and documentation you find you need assistance, please contact us or fill out a Request For Quote.

FileMaker and the file folder logo are the registered trademarks of FileMaker, Inc. in the U.S. and other countries. FileMaker images are used with the permission of FileMaker, Inc.

Doc v5.0 03/2011

The Mail Manipulator plug-in provides an efficient way to exchange data between FileMaker® Pro and Mac OS X Mail® using nothing more than FileMaker script steps.

No AppleScript or XML programming is required as all integration is performed with FileMaker script steps and calculations!

Import Mail with Attachments:

Import e-mails including attachments from Mac Mail into FileMaker. This allows you to create a complete archive of all e-mail correspondence in your FileMaker solution that can be shared with the entire organization.

Send Mail with Attachments:

Send plain text formatted e-mails with MULTIPLE attachments. There is no limit to how many attachments you can send!

Move Mail:

Moves e-mail between Mac Mail folders which allows you to create "archives" within your Mac Mail folder structure and further organizes your processed e-mail.

Accounts Supported:

The plug-in supports Exchange, IMAP and POP mail account types.
