

# Help Using Mindshare Presenter v 1.0

The basic layout of a presentation -

**Overview** - Use the **video controls** to start and stop the presentation, show or hide the **closed caption display area** (if available), and adjust the **volume**. Use the **main menu** to navigate through the presentation. There may also be documents or web links available from the main menu.

**Keyboard Control** - Mindshare Presenter can be controlled using your keyboard in addition to your mouse. Pressing the **left and right arrow keys** has the same effect as clicking the **BACK** and **NEXT** buttons on the presentation. Pressing the **up or down arrow keys** adjust the presentation volume. Pressing the **space bar** toggles playback between the play and pause states.
