This End-User License Agreement ("Agreement") is a legal agreement between you (an individual or a single entity) and VLSOLUTIONS for the Software Product which may include software components, media, printed materials, and "on-line" or electronic documentation ("Software"). By installing, copying, or otherwise using the Software, you agree to be bound by this Agreement. If you do not agree to the terms of this Agreement, do not install or use the Software.

The Software is protected by copyright laws and international copyright treaties, as well as by other intellectual property laws and treaties. The Software is licensed, not sold.

### 1. Definitions

"Software" means all the contents of the files with which this agreement is provided, related explanatory written materials or files ("Documentation") including related files accessible from [www.vlsolutions.com](http://www.vlsolutions.com), and upgrades, modified versions, updates, additions and copies of the software, if any, licensed to you by VLSOLUTIONS (collectively, "Updates").

"VLSOLUTIONS" means VLSOLUTIONS SARL, 8 avenue des quatre vents, 30210 Ledenon, FRANCE, a company organized under the laws of France.

"Module" means the executable part of the VLDOCKING FRAMEWORK Software. It is distributed as a jar file containing a set of java files (classes and resources). This set of files is a Module and can be used as is, or otherwise included in another third-party jar file during the deployment of a Main Application.

"Main Application" means any software application, property of or licensed to you, which uses VLDOCKING FRAMEWORK in order to extend its look and feel or functionalities.

### 2. Grant of License.

The Software is licensed as follows:

(a) Backup Copies. You may make copies of the Software for backup and archival purposes only. The backup copies must include all copyright information contained in the original.

(b) Installation. This software being a java module of a Main Application, VLSOLUTIONS grants you the right to copy the module part of the Software (java executables) on any computer on which the Main Application is installed, and on storage devices, such as a network server required for hot deployment of the Main Application

(c) Usage. The number of developers that may use the Software is defined during the purchase of the licence. A developer becomes a Software User if he has to create, maintain or update a program using the Software API directly or indirectly (via another API) in order to obtain an effect from the Software. This state of user is maintained for 3 (three) months after the last direct or indirect usage of the API. After that 3 months delay, another developer can become a Software User in replacement of the previous.

If the Software API is exposed directly or indirectly to the users of the Main Application (for example, by means of a scripting language or java interpreter), those users are considered as Software Users (developers) and must be included in the maximum users count allowed by the licence.

(d) Mono-site License. Developers using the Software must be located on the same site (workplace). Developers using the Software can be located on multiple site only if this permission is granted at purchase time.

(e) Maximum of software users extension. If the number of developers concurrently using the Software, defined at purchase time, as described in (c), is too limited for your needs, even temporarily, or if the number of sites as described in (d) increases, you must contact VLSOLUTIONS to purchase an additional licence adapted to this new maximum count.

(f) Trial and/or Demo Software (if applicable). If this Software is marked "Trial", then this license to use the Software under the conditions set herein is granted to you for 30 (thirty) days from the first time you run the Software. After the period specified is over, this grant of license expires.

If this Software is marked "Demo", it can be used and distributed without limitations.

(g) Academic or Educational License (if applicable). If this Software is marked "Academic" or "Educational", your license only permits use in qualified educational institutions.

### ***3. Maintenance of Copyright Notices.***

All the native resources, restrictions and copyright notices shipped with the original product must be preserved and included with all copies of the Software.

This Software being a module of a Main Applications, this Main Application must bear an easily accessible Copyright notice of the Software (for example in an "About box" or on the "starting Splash Screen" of the Application).

### ***4. Prohibition on Reverse Engineering, Decompilation, and Disassembly.***

You may not reverse engineer, decompile, or disassemble the Software, except and only to the extent that such activity is expressly permitted by applicable law notwithstanding this limitation. You may not create derivative works based upon the Software in whole or in part, unless otherwise expressly indicated by VLSOLUTIONS.
