SyncPhone-PlugIn

Mac OS X – Gigaset SX 353 ISDN – Address Book Plug-In – Version 0.8 Beta – Last Update: 2010-04-05

What is SyncPhone-PlugIn

This plug-in will allow you to dial any selected phone number from your Address Book directly with an USB connected Siemens Gigaset SX 353 ISDN phone. Simply left click on any phone number label within your Address Book, choose "**Dial with Gigaset ISDN…**" from the context menu and the phone will dial the selected number for you.

Installation and Removal

Copy the file **SyncPhonePlugIn.bundle** into the folder: **/Library/Address Book Plug-Ins**. To uninstall it, simply trash the file: SyncPhonePlugIn.bundle.

Important Notice

This beta version software is still under development and has not been tested with different configurations. **You use it at your own risk!** Please report any error or unexpected behavior to: **info@syncbyte.de**

Notation of phone numbers

With version 0.8b phone number notation must follow the rules of ITU-T E.123 or DIN 5008:

Example for international phone number: +49 2173 1650740

Example for national phone number: 02173 1650740

If your country is supported* the plugin will transform international numbers into national numbers for dialing when called from within your country.

Example: +49-2173-1650740 will be dialed as 021731650740 in Germany.

ATTENTION: The common notation of +49-(0)2173-1650740 for phone numbers in Austria and Germany is only allowed for national calls and will FAIL for international calls!

Examples for valid international phone number formats:
    +49 2173 16 50 74 0
    +49-2173-1650740
    +4921731650740
    +49 / 2173 / 165074-0
    +49.2173.1650740
    004921731650740 (leading 00 should be your country's dialing prefix for international calls)

Examples for valid national phone number formats:
    02173-1650740
    1650740 (without area code)

Version History

- **Version 0.5b**
- Initial release.

- **Version 0.6b**
- Added support for international phone number formats.
- Usage time limit has been removed.
- Various internal changes

- **Version 0.7b**
