

## Search Help

The SEARCH button opens a dialog box titled “Adobe Acrobat Search”. This dialog is available in Acrobat 4.0 and Acrobat Reader 4.0 (search-enabled). If you do not have the search-enabled version of Acrobat Reader 4.0 then you can install it from the CD-ROM. The file name is:

rs405eng.exe

Keyword Field

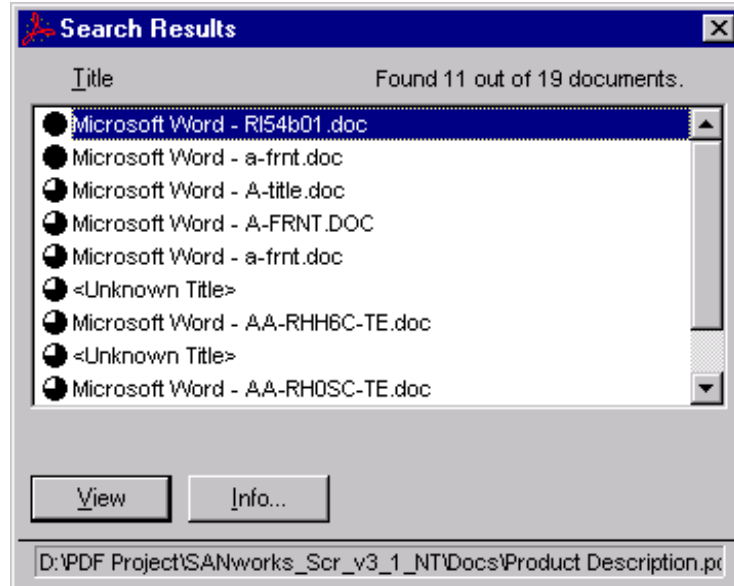

Enter keywords for a search of the document collection in the keyword text field shown. Examples of different keyword searches are shown in the table.

Example	Explanation
RAID	Finds documents containing the word “RAID” or “raid”, or “Raid”. If the Match Case option is checked then only “RAID” is matched.
RAID AND mirror	Finds documents that contain the word “RAID” as well as the word “mirror”. If the proximity option is checked then the two words must be within three pages of each other for a match. The closer the two words are the better Acrobat will rank the match.
“RAID and mirror”	Finds documents containing the phrase “RAID and mirror”.
RAID AND NOT mirror	Finds documents containing “RAID” but that do not contain the word “mirror”.
RAID OR (mirror AND NOT(stripe))	Finds documents containing “RAID” or that contain “mirror” while not containing “stripe”. The parentheses help clarify the order of evaluation of the OR, AND, and NOT operators.
“RAID ?”	Finds documents containing “RAID 0”, “RAID 1”, “RAID a”, etc. The “?” is a wild card character.

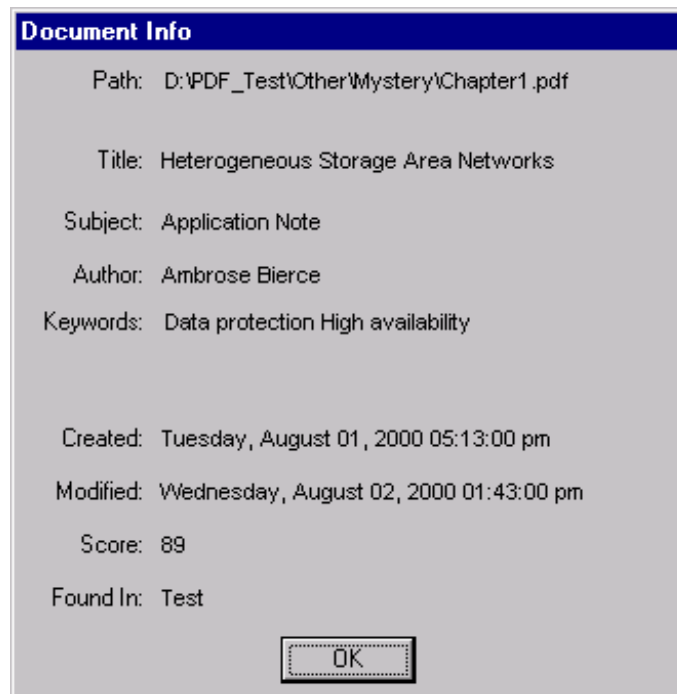

## Results Help

The results of a keyword search are displayed in the Search Results dialog box.

Every document containing text that matches the keyword search is listed. The documents that best match the keywords are listed first.

If the PDF document has values defined for its properties they can be viewed by selecting the document title in the results list and clicking Info.

In order to view the contents of a document select it in the results list and then click View. The document will open to the first match to the keywords.

*This chapter describes the StorageWorks software for IBM and the steps for installing it onto IBM Systems running AIX. The installation steps include organizing your system and existing files and loading and installing the RAID software onto your hard disk.*

### **3.1 Introduction**

The procedures for installing the RAID software for IBM on AIX require that you be familiar with the *System Management Interface Tool, SMIT*. See the *System Management Interface Tool* section in the *System Management Guide: Operating System and Devices* for more information on the use of *SMIT*.

Installing the RAID software on AIX requires the following major steps:

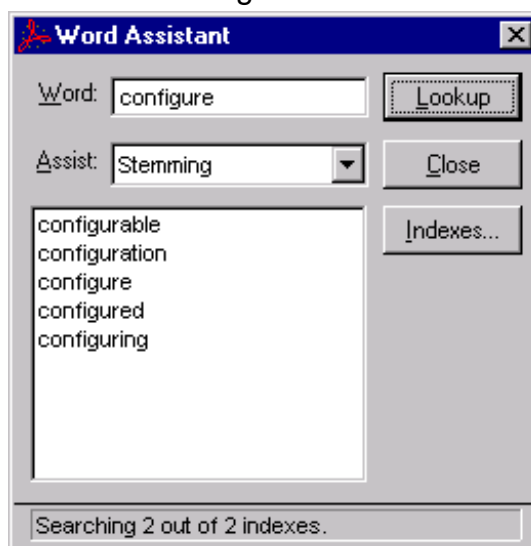

Click the Next Highlight icon,  , to go to the next page in the document with matches to the keywords.

If there are no more matches in the current document then Next Highlight will close it and open the next document in the results list.

Use the keyboard shortcut Ctrl+] instead of clicking the Next Highlight icon.

## Assist Help

The Assist button opens the Word Assistant dialog box.

The Word Assistant will display the words that Acrobat will generate from a given keyword for a given search option.

Enter a potential keyword in the Word text field. Next choose one of the three search options in the Assist list: Stemming, Sounds Like, or Thesaurus. Click Lookup.

For Stemming Word Assistant generates the possible word endings for the keyword.

For Sounds Like Word Assistant generates a list of words that sound similar to the keyword.

For Thesaurus Word Assistant generates a list of words with meanings similar to the keyword.

It is possible to select generated words and Copy/Paste them into the keywords text field of the Adobe Acrobat Search dialog. This allows you to more precisely configure your keyword search.
